

# Electric Chain Hoist

## Description

The Electric chain hoist can be operated in different lifting speeds because of the modular design of its motor and reducer.

## Advantages

1. Advanced performance structure, convenient to lift with light weight
2. Easy to handle, reliable performance, wide using scope, heavies, load and unload
3. It also can be installed on I-beam, cantilever crane and fixed point to lift heavies

## Specification

Model	Electric Chain Hoist
Lifting Capacity	0.1t ~5t
Lifting Height	3-8m
Power	0.9-4.8Kw
Warranty	1 Year
Running speed	10m/min
Certification	CE ISO GOST
Work duty	M5
After-sales Service Provided	Video technical support
Machinery Test Report	Provided
After Warranty Service	Video technical support, Online support
Package Type	Packaged by High quality wooden case

## Application

This electric chain hoist is mainly used to lift light and small size materials or goods in the processing and assembly line of general manufacturing, packing and painting. The electric chain hoist can not only for fixed suspension use, but also can be used with electric monorail trolley and hand push/pull monorail trolley.
