

# Double Girder Trolley Hoist

## Description

Double Girder Trolley Hoist can be installed on double girder overhead crane as its lifting mechanism. The rated load is up to 80t.

## Advantages

1. Modular components, simple maintenance and cost effective
2. Easy operation with ergonomically designed control pendant
3. Compact design with excellent side approach dimensions

## Specification

Model	Double Girder Trolley Hoist
Lifting Capacity	1t~80t
Lifting Height	6m~36m
Power supply	3Ph,380V,50Hz or on customer request
Warranty	1 Year
Hoist Motor	Rugged 12/2-pole cylindrical-rotor motor (selection of frequency conversion)
Brake	DC disc brake with brake release monitoring (optional)
Gear Box	3-stage, helical gear reducer
After-sales Service Provided	Field installation, commissioning and training
Machinery Test Report	Provided
After Warranty Service	Video technical support, Online support
Ambient temperature	‘-25-40°C
Package Type	Packaged by High quality wooden case

## Application

Composed by the CD1/MD1/HC etc. stationary type electric wire rope hoist with trolley, the Double Girder Trolley Hoist is mainly used for the lifting mechanism of the overhead crane and gantry cranes with the working duty of M3 or M4. The lifting speed with normal speed and creep speed, and the creep speed should be selected under precision conditions. The trolley running speed only has one.
